"Let's Talk" is a webinar series created by Drs. Angela Rodgers and Renee Thomason, two family medicine physicians who identify as women of color. The goal of the series is to provide women with support and resources related to the challenges and lifelong journey of living with alopecia with a focus on the psychosocial impact and prioritizing wellness. We celebrate the diversity of women from all cultures, identities, and lived experiences and recognize that although we do share the common thread of alopecia, our experiences may differ based on our background and that is what makes our community special. This is a sisterhood that offers belonging, cultural humility and real conversations on difficult topics.
