

How to use ClinicalTrials.gov to find clinical trials on alopecia areata

Follow the steps outlined below to search for up-to-date information on alopecia areata clinical trials.

Step 1: Open your web browser and navigate to the clinicaltrials.gov homepage.

The screenshot shows the ClinicalTrials.gov homepage. At the top left is the NIH U.S. National Library of Medicine logo and the text 'ClinicalTrials.gov'. To the right are navigation links: 'Find Studies', 'About Studies', 'Submit Studies', 'Resources', 'About Site', and 'PRS Login'. Below this is a blue banner with the text: 'ClinicalTrials.gov is a database of privately and publicly funded clinical studies conducted around the world.' On the left side, there is a section titled 'Explore 443,469 research studies in all 50 states and in 221 countries.' with a button that says 'See listed clinical studies related to the coronavirus disease (COVID-19)'. Below this is a disclaimer: 'ClinicalTrials.gov is a resource provided by the U.S. National Library of Medicine. IMPORTANT: Listing a study does not mean it has been evaluated by the U.S. Federal Government. Read our disclaimer for details. Before participating in a study, talk to your health care provider and learn about the risks and potential benefits.' On the right side, there is a search box titled 'Find a study (all fields optional)'. It contains three sections: 'Status' with radio buttons for 'Recruiting and not yet recruiting studies' and 'All studies'; 'Condition or disease' with a text input field and a clear button (X); 'Other terms' with a text input field and a clear button (X); and 'Country' with a dropdown menu.

Step 2:

- Look for the **Find a Study** fill-in box located on the right side of the homepage.
- Under **Status**, make sure that “All studies” is clicked.
- Under **Condition or disease** type in: **Alopecia Areata**
- The **Other terms** field is optional. However, if you know a specific study drug that you are interested in, or the sponsoring drug company, or the researcher conducting the study, you may enter it here.
- Under **Country**, select the country where you live from the drop-down menu. If you select United States, you can also enter for state. You may choose to leave the city blank or enter your city and the distance you are willing to travel for a trial.

See the example below.

Find a study (all fields optional)

Status ⓘ

Recruiting and not yet recruiting studies

Brief Summary:
This study is designed to select up to two doses of baricitinib (referred to as low dose and high dose) and assess their efficacy and safety for the treatment of severe or very severe alopecia areata. An additional subpopulation of 60 participants in the US will enroll in the

Keep in mind that by contacting a study site, you are not making a commitment to participate in a clinical trial. This is only the first step in getting more information about the clinical trial so that you can make an informed decision about whether participating is right for you.

Note:

- ClinicalTrials.gov is a great resource for learning about clinical studies and staying up to date on the latest research in alopecia areata. Under the interventions column you will be able to see what drugs are currently undergoing testing for the treatment of alopecia areata.
